

The EMPLEX MPS Lite Portable Rotary Sealer

Using the fundamentals of our [MPS 6000](#) series production band sealers, the [MPS Lite](#) is a constant load machine designed for portable sealing applications as well as low production sealing requirements.

At only 11 lbs., the sealer is light enough to carry and has been weighted with the user in mind to allow for either portable or stationary sealing.

Employing a digital PID autotune temperature controller and a variable spring pressure system, the operator can easily set the appropriate sealing parameters for their particular bag or material.

Whether you are sealing liners in a drum, looking to seal a small number of bags per hour, or in need of a cost effective backup to your production sealer, the [MPS Lite](#) can do the job.

Technical Specifications of the MPS Lite

Seal Width:3/8"
Width:6"
Height:7 1/2"
Length:14 1/2"
Approximate Weight:11 pounds.
Throat Depth:1 1/4" from bottom of the seal.
Heater Bars:One pair of 2 1/2" long thermostatically controlled, pressure adjustable.
Cooling Bars:One pair of 3" long, fan cooled, pressure adjustable.
Approximate Speed:180" per minute.
Uses:Designed to seal bags 5 mil in thickness or less.
Construction:Anodized aluminum & stainless steel.
Electrical:115 VAC, 60 Hz, 2 amps, single phase.
Motor:Fixed speed A/C drive.
Includes table top stand.
